allowed)**

SELECTION PROCEDURE

**Round 1-Online Test
Round 2-Personal Interview**

INTERN EXPERIENCE TALK

BRACH :- Electrical and Electronics Engineering

INTERNSHIP SEASON :- Internship

DESCRIPTION OF ROLE :- Software

JOB LOCATION :-

SKILLS LEARNED :-

Don't think too much about cgpa cutoff and all if you have less cgpa. Try to improve your skills as much as you can. There will be some companies with no cgpa cutoff. Don't just give ordinary answers in HR Interview. Try to answer them in a diplomatic way.

In a technical interview try to interact with the interviewer while you are solving a problem. Don't just do on yourself. If you interact with him he may help you out if you are struck. By prepared on how to introduce your self to the interviewer beforehand

DESCRIPTION OF ONLINE TEST :-

The online test consists of 3 sections with 45 questions in total (15 questions in each section). First section consists of aptitude questions, second section consists of c programming and some hardware related, third section consists of computer fundamentals based questions (DBMS,OS)

DESCRIPTION OF INTERVIEW :-

My technical interview mainly focused on logical thinking. They asked me three DSA questions and a puzzle. The three questions are: Rotation of a matrix by 90 degrees

Maximum sum path in a tree

Number of distinct islands in a grid(graph approach related problem)

The puzzle is: There are 10 bags with each bag containing infinite number of coins. The weight of each coin is 1 gram. There is a defective bag with weight of each coin in that bag is 1.1 gram. How will you find the defective bag using digital weighing machine. (You need to tell him the optimal logic)

DESCRIPTION OF HR ROUND

The HR round mainly focuses on your way of thinking and diplomatic answering. They asked me some questions based on my resume and projects then some questions related to critical thinking. Here are some of the questions that they asked me: How will you balance your work life management? How will adjust yourself in a new location? How will you overcome the local language barrier when you are asked to work in an unknown location? Why should our company select you? Why you are interested in Software when you are from Electrical background?

If you are given a huge work that can't be completed in a one week but you are given a deadline of one week. How will you complete the task?
